

Proof-of- Social-Utility

Qindo Whitepaper

The problem

- **Because inflation makes you poorer and deflation makes new comers less productive.**
- **Because simplr tax in trade with holding-driven redistribution system can't be fair.**
- **Because a socialism in an anon world is the biggest crypto dream.**

Our solution

We are building a disinflationary social capitalism without tax in trade thanks to Proof-of-Social-Utility mechanisms bringing incentivised solidarity based on self-regulated democratic and financial powers through 8 unprecedented features.

Social Promotion

Use \$QINDO in an NFT-and-social-network-API-based permissionless upvote system.

Receiver's quantum \$QINDO upvote :

$$Q = (\sum B + 1) / (\sum A + 1)$$

With unlimited upvote from the candidate (A) and from tiers (B). A & B updated in real time.

A user can vote to a profile as many time as he can.

Social Harvest

Get right to periodically mint \$QINDO rewards for ever by using/burning \$QINDO.

Daily \$QINDO claimable reward for tiers upvoters and per upvote given :

$$R = 1/Q$$

Social Staking

See your \$QINDO balance growing each time someone burns \$QINDO in QINDO's interface.

\$QINDO reflected reward for \$QINDO holders per upvote given by the community :

$$P = Q/3$$

Social Farming

Burn your upvote score linked to your NFT to get your share of a \$QINDO reserve.

Social Score for receiver :

$$S = (\sum A + 1) * (\sum B + 1)$$

With upvote from the candidate (A) and from tiers (B). A & B updated in real time

\$QINDO available reward to claim for upvote received from tiers and by burning S :

$$C = Q/7$$

The burnt score proportionnaly decreases A and B.

Social Reflection

Utility-driven reflection stabilizing total supply by impacting holders and reserve when \$QINDO is burnt and mint.

It's is not tax in trade. It is tax in utility.

It is not elastic supply coin. It is a rigid supply of a burnable and mintable coin.

Social Pool

Request money from your friends and track your activity in a friendly way

Social Lending

Use a Communitary Elastic Index Fund and your own NFT to lend and borrow as never before.

Augmented NFT and Social Legacy

Trade your NFT in Qindo interface and track their 4 augmented values (collateral, claim, future reward, social score)

Roadmap

**\$Qindo Social bounty 40%
and listing at Sushiswap
and coinmarketcap**

Q4 2021

**\$Qindo LP locker bounty
40% and Social Pool app**

Q1 2021

Qindo Social Lending

Q2 2022

**\$Qindo/\$Qin Swap, giant
NFT airdrop**

Q3 2022

**Qindo Social Promotion,
Harvest, Staking, Farming,
Reflection, Legacy**

Q4 2022

1 \$QIN = 1\$

Q1 2023

A project by the People, for the People

**40% for bounty program and
40% for LP lockers before
01/01/22 (from 3 to 8 months).
10% for team and 10% for
marketing operation.**
